

ACKNOWLEDGMENTS

This *Listening to the River Guidebook* and its companion pieces, *the project website* at www.listeningtotheriver.org, and the *LTR Tool Kit*, were developed under grant funds from the National Science Foundation, Informal Science Division. *LTR* project coordinators Carl Ferguson and Chris Kitzman documented and organized the majority of the guidebook's content after it had been conceived, developed, and revised through the on-going brainstorming and watchful guidance of *LTR* project partners.

Project Partners

The Principal Investigator was Joe VanderMeulen, PhD., Executive Director of LIAA – a Traverse City-based nonprofit organization. Other representatives on the partnership team included Jim Muratzki and Paul Reiss from LIAA, Anne Drake, Mary Manner, and John Noonan of the Great Lakes Children's Museum, Becky Ewing and Colleen Masterson of Northwestern Michigan Community College's Water Studies Institute, Wanda Repke from Michigan State University Extension's 4-H program, and Peter Payette of Interlochen Public Radio. Mark St. John and Dawn Robles of Inverness Research, Inc. of California led the project's evaluation team.

Additional Thanks

We would like to especially thank all the youth participants, parents, the project advisory council, content experts from community organizations, informal and formal science educators and all the other staff members of the partner organizations who contributed ideas, expertise, vigorous discussions, editing and proofreading skills to the production of this guidebook.

Particular thanks go to these Grand Traverse area organizations and individuals for their participation and co-sponsorship of *LTR* activities: Optimist Club, Youth Conservation Corps, Upward Bound, Grand Traverse Conservation District, Old Town Playhouse, Leelanau Conservancy, Grass River Nature Area, as well as video documentarians Kate Trainer and Eartha Metzger, radio producers Lou Blouin and Linnaea Mulcarek, and Matthew Martin DesignWorks, contractors for exhibit design and installation.

LIAA's Designer, Kaye Krapohl designed the guidebook's layout and cover, and Copy Central printing company handled the production.
